About the Expo

Nigeria Pharmtech & Ingredients International Expo is the Largest Pharmaceutical Exhibition to be held during **12-13 May, 2026 at The Balmoral Convention Centre, Sheraton, Nigeria**. The international expo provides an immense opportunity to capture the untapped market of the west African Region through Nigeria. The show is organised by Astrovison Global FZCO Dubai. The exhibition will be the gateway to the West African Pharmaceutical Business Community in Nigeria. It is the premier exhibition series in this sector in the West Africa Region.

As the first and only health business event/forum bringing together the key decision makers and captains of the pharma industry, the exhibition is a must attend global event in the pharmaceutical calendar and offers an ideal environment for companies to showcase their products in one of the fastest growing and most lucrative pharmaceutical markets in the world. The Pharmaceutical Expo enhances understanding and fosters meaningful connections by engaging with pharma industry. This initiative ultimately reduces the knowledge and accessibility gaps in pharmaceutical & ingredients industry.

Nigeria Pharmaceutical Market Overview

- The pharmaceutical industry is broadly grouped into the branded, generic and Over The Counter (OTC). Although there are over 130 pharmaceutical manufacturing companies in Nigeria, Nigeria still imports over 80% of its pharmaceutical need with all active pharmaceutical ingredients (APIs) used in Nigeria being imported, mainly from India and China. In most cases, both primary and secondary packaging materials are obtained locally.
- Nigeria's pharmaceutical market is experiencing a surge in demand for locally produced generic drugs.
- Nigeria is the largest growing economy in the West Africa Region.
- One important aspect to consider about the Nigerian pharma market is the population is seeing strong growth. The current estimate of 220 million is expected to reach 262 million by 2030, and become the planet's fifth largest population of 400 million by 2050.
- Nigeria alone spends over \$1.5 billion annually on pharmaceutical imports, reflecting the region's heavy reliance on international manufacturers to supply essential medicines.
- There is a steady increase in demand of Medicines and Health Supplies in Uganda which is indicative of the growing market.

Why Exhibit Nigeria ?

- To promote your company to decision-makers through numerous branding opportunities offered with each sponsorship and exhibitor package.
- Providing platform for new product launch and branding opportunity.
- Providing networking opportunity in Nigeria and other west African countries.
- Platform to get connected with Main Decision Makers and form alliances.
- B2B Platform for Buyers and Sellers from Medical and Healthcare sector.
- Benchmark your company's strength to leading companies in Nigeria.

Nigeria Pharmaceutical Market Statistics

- Nigeria's pharmaceutical market is the largest in West Africa, experiencing robust growth with a projected value rising from \$2.35 billion (3.53 trillion) in 2022 to \$4.2 billion (6.3 trillion) by 2028.
- The Nigerian pharmaceutical market is a large and growing market with significant potential for growth. Over 80% of medicines in Nigeria are imported, with medicines accounting for perhaps \$4 billion within Nigeria's total healthcare spend of \$10 billion. Out-of-pocket expenditure can be as high as 62% of total healthcare expenditure, mainly due to limited access to health insurance.
- Nigeria has about 80,000 retail pharmacies and out of that about 4,500 are only registered pharmacies, and more than 70% of revenue potential lies in unregistered and informal outlets served by some 200 wholesalers.
- 45% of the pharmaceutical consumption is concentrated in the top five Nigerian cities, and per capita spending in big cities can reach almost twice the national average. Cities are important for another reason too: their superior logistics, infrastructure, and healthcare capabilities make them an engine for structural changes in Nigeria's health system.
- Nigeria continues to rely on pharmaceutical imports to meet local demand, despite government aims to make Nigeria's pharmaceutical market self-sufficient, there continues to be little local drug production. Total Pharmaceutical and medical importation of Nigeria in 2021 touched USD 2.5Bn, with pharmaceutical imports touching USD 1.4Bn and rest is medical equipment's and devices.
- India is the largest supplier to the Nigeria Pharmaceutical and Medical equipment market, with exports touching USD 442Mn in 2022, followed by Netherlands, China UAE Denmark France and others among the top suppliers.
- As the second largest economy in Africa with a growing middle class and pro-reform government committed to strengthening the healthcare system, the Nigerian medical device market is set to be beneficial to the country and get better.
- While recent macroeconomic headwinds have affected the affordability of treatment, the country's large and growing population, rising demand for specialty services and the government's willingness to plan and partner with private providers should help considerably in improving the quality, access and outcomes of patient care in the years to come.

About the Organiser

Astrovision is a Dubai-based company founded in 2023. The company specializes in organizing major international exhibitions across multiple industries, including Beauty, Cosmetics, Pharmaceuticals and Healthcare, Food and Packaging, Power and Energy, Construction, Textiles, Gems and Jewellery.

To date, Astrovision has successfully organized over a dozen exhibitions across regions such as ASEAN, Africa, and the CIS. The company collaborates with partners around the world, ensuring the seamless execution of exhibitions, conferences and B2B meetings.
